

GOALS of HUMAN TRAFFICKING

In light of the fact that only a few thousand girls are rescued each year out of an estimated 27 million world-wide, this comprehensive plan entitled, "**STEPS TO A COMPLETE SOLUTION**" is **essential** if we are to reach a **goal** of ZERO (**300,000**) girls that are in the sexual slavery of Human Trafficking in the U.S. by the year 2020. And a further **goal** of reducing the estimated number (an 27 million) trafficked in the world by 80% also by the year 2020.

It is estimated that over 500 organizations and individual researchers are involved in the fight against this sexual slavery and some have been working for 10 years spending hundreds of millions dollars. If any other field of humanitarian effort recorded such a small level of accomplishment the results would be classified as a dismal failure. In addition, if large numbers of girls were to be rescued they could not be adequately housed or given realistic help to overcome the trauma that they carry. In the USA only 70 beds exist to assist those rescued.

With these **facts** it is obvious that something must be done to develop **actual, tangible, and legitimate** solutions that will make a difference. **Our contention** is that all the current effective solutions make up only about 5% of the full range of solutions **that are needed** to increase by factors of 10 to 100 the number of girls rescued each year. Please read the report which presents the **STEPS TO A COMPLETE SOLUTION** to see the documentation of the details.

We must emphasize that we are **not saying that nothing has been accomplished** in the last 10 years. Laws have been passed. Human Trafficking indicators have been developed. Research has identified the characteristics of the traffickers and the johns that purchase sex, as well as the situations in which girls are trafficked. Despite all this, there is a need for real **actual, tangible, legitimate** solutions!
